Section #	C	NC	R	Narrative	To Be Corrected
187	X			Measured sliced watermelon and cantaloupe in display cooler at 45 F. It was moved to the walk-in cooler that was below 41F. This cooler cannot be used for storing potentially hazardous food, including sliced melon, until it can maintain a temperature of 41F or below.	1 week
269		X		Observed no 3 compartment sink in establishment. Person-in-charge (PIC) stated that trays in the meat cooler were washed in the curbed mop sink. The establishment needs to implement a 3 compartment sink system with a series of tubs that can be filled and dumped in the mop sink. The first tub should be used to wash trays with a detergent. The second to rinse trays. The thirs step of the warewash process is to sanitize. This can be done with a spray bottle of sanitizer. Equipment should be allowed to air dry. A different method of warewash could be proposed if submitted to our department for approval.	2 days
415	X			Observed rodent droppings in hallway behind walk-in freezer.	1 day
297		X		Observed dried food debris on raw chicken trays in display cooler.	2 day
304		X		Observed no method of air drying trays that are used for meat storage.	1 week
